Alexander explained that the Connecticut Department of Public Health (CT DPH) is still reviewing the septic system. The applicant is operating under two extensions from the Commission.

      - S. Adelman requested that all approvals (e.g.: CT DPH) be noted on the final plans.

5. **CGS 8-24 Referral.**

   a. **Purchase water and sewer utilities along Salem Turnpike (Route 82) between the Norwich town line and Noble Hill Road; Extend water main from Noble Hill Road to South Road, along Salem Turnpike.**

      S. Alexander explained that CGS §8-24 requires a “report” from the Planning (& Zoning) Commission prior to major capital projects, such as utility line extensions.

      G. Pianka explained that the current referral would contain an advisory opinion from the Commission for the purchase of water and sewer lines recently installed, as well as future extensions of water (and possibly sewer) lines on South Road. The Commission reviewed plans prepared for water line extensions.

      S. Alexander explained that he prepared a memo outlining ways in which water and sewer extensions on Salem Turnpike are positively related to the Plan of Conservation and Development:

      - **Page 24:** “According to survey response the preferred area of town for future Commercial development is Route 82/Salem Turnpike.”
      - **Page 25:** “Promote the expansion of public utilities in areas deemed appropriate by this plan.”
      - **Page 25:** “Provide municipal facilities and services adequate to meet the needs of all Bozrah’s residents.”
      - **Page 27:** “…the Salem Turnpike (Route 82) area of town contains a mix of commercial and residential development. This area has the potential to access both public water supply and sewer service from the City of Norwich. Presently, this infrastructure exists at the Bozrah/Norwich town line. A high percentage of responses to the POCD questionnaire felt that this area was the preferred location of commercial growth…”
      - **Page 30:** [Figure 7: Future Land Use Map - Salem Turnpike is designated as appropriate for “Business, other high-density uses”].
